

RUTH BONARERI ONDIERE

Nairobi, Kenya | +254705616648 | bonareriondiere@gmail.com | [linkedin.com/in/ruth-ondiere-254009198](https://www.linkedin.com/in/ruth-ondiere-254009198)

PROFESSIONAL SUMMARY

Data analyst with a background in electrical and electronics engineering and hands-on experience supporting IoT data processing systems for 500+ connected devices. Currently interning as a data analyst at Infotrace Analytics, building dashboards in Power BI and Tableau, and writing PySpark ETL pipelines. Skilled in Python, SQL, and machine learning, with growing expertise in predictive modeling and data visualization. Contributed to a 25% increase in product adoption through data-informed client training. Advancing data analytics skills through a Master's in AI and Technology Management at Nexford University.

SKILLS

Data Engineering: Python (Pandas, NumPy), SQL, PySpark, ETL, statistical analysis, and data mining

Machine Learning: Scikit-learn, TensorFlow, NLP, predictive modeling, Random Forest, XGBoost, and feature engineering

Visualization & Tools: Tableau, Power BI, Matplotlib, Jupyter Notebooks, and REST APIs

Cloud Platforms: AWS (S3, EC2), Git, Docker, and A/B testing frameworks

Engineering Foundation: IoT systems, technical troubleshooting

PROJECTS

EduRoutes: School Transport Optimization | Academic Project *April 2025 - Present*

- Currently developing a platform that leverages geospatial data and clustering algorithms to optimize school transport costs by 35% for schools in Nairobi.

Airline Fare Prediction Engine | Personal Project *June - August 2025*

- Developed a predictive pricing model analyzing 50,000+ flight records, achieving 85% prediction accuracy using Random Forest and XGBoost algorithms.
- Improved model performance by 22% through feature engineering and hyperparameter tuning, enabling more accurate fare forecasts.

AI-Powered Course Advisor Chatbot (RAG System) | Hackathon Winner *May 2025*

- Built a retrieval-augmented generation system using NLP and the OpenAI API, improving information retrieval accuracy by 40%.
- Secured 1st place in a competitive hackathon, outperforming 50+ teams.

EXPERIENCE

Data Analyst Intern | Infotrace Analytics, Nairobi *February 2026 - Present*

- Build interactive dashboards in Power BI and Tableau to visualize sales, churn, and operational KPIs for internal stakeholders.
- Write Python and PySpark scripts to clean and transform large datasets from multiple sources, reducing data preparation time by 40%.
- Generate weekly and monthly reports with actionable insights, presented to management to guide strategic decisions.
- Collaborate with the data engineering team to optimize ETL workflows and ensure data accuracy across reporting systems.

IoT Engineer Intern & Technical Customer Associate | *Hello Tractor, Nairobi* Sep 2023 - Jan 2025

- Engineered a scalable IoT data processing pipeline handling data from 500+ connected tractors, enabling real-time analytics that optimized fleet performance for enterprise clients.
- Drove a 25% increase in product adoption and 15% improvement in customer satisfaction by training 100+ enterprise clients on data-driven best practices.
- Reduced client-reported errors by proactively resolving system issues, improving data reliability across the platform, and minimizing operational downtime.
- Monitored key performance metrics to ensure optimal functionality, collaborating with engineering teams to align product features with customer needs.

Electrical & Electronics Intern | *State Department of Public Works, Nairobi* Jan 2022 - April 2022

- Created detailed design drawings and cost estimates using AutoCAD, ensuring accuracy and adherence to project specifications for electrical systems.
- Participated in the design of various electrical systems, including lighting, power, CCTV, access control, and fire alarm systems, contributing to comprehensive security and operational solutions.
- Assisted in site surveys and supervised installations to ensure compliance with design and safety standards.

Audio-Visual Technician Intern | *Proscene Systems Limited, Nairobi* Jan 2021 - May 2021

- Installed and maintained AV equipment, including projectors and conferencing systems, for corporate events.
- Diagnosed and resolved equipment malfunctions, ensuring seamless operation during presentations for 20+ events.
- Collaborated with event organizers to align technical setup with requirements, delivering on-site support without disruptions.

EDUCATION

Master of Science in Artificial Intelligence and Technology Management | Feb 2026 - Present
Nexford University | Washington DC | Remote

Bachelor of Science in Electronics and Computer Engineering | 2016 - 2022
Jomo Kenyatta University of Agriculture and Technology | Juja, Kenya

PROFESSIONAL DEVELOPMENT

Intensive Program in Data Science & AI <i>KIEP-SKIES (World Bank-Sponsored)</i>	2025
AWS Certified Cloud Practitioner <i>Amazon Web Services</i>	2022
NVIDIA Deep Learning Institute <i>Getting Started with Deep Learning</i>	2025
<i>Data Scientist with Python Track</i> <i>DataCamp</i>	2025
